Subject: **New Daikin *ONE* Wireless RHT Sensor for Daikin *ONE+* Smart Thermostat**

We are pleased to announce the launch of the Daikin *ONE* Wireless Relative Humidity and Temperature (RHT) Sensor (DSEN-TH-BWS-A) for connectivity to Daikin *ONE+* smart thermostat.

The RHT Sensor is a compact wireless sensor designed to measure the average temperature and humidity between the sensor and the thermostat. While the Daikin *ONE* Wireless RHT Sensor is not a thermostat, it delivers thermostat-like functionality by sensing temperature and humidity conditions with full control through the *SkyportHome* app. Homeowners can adjust comfort settings just as they would with a traditional thermostat—without needing a physical display. The Daikin *ONE* Wireless RHT Sensor can bring intelligent comfort control to any home with a Daikin *ONE+* smart thermostat, without the complexity or cost for additional zoning and thermostats, providing a smart, economical alternative for accurate temperature and humidity detected by a single thermostat.

Installation is quick and flexible. Up to 8 Daikin *ONE* Wireless RHT Sensors can be connected to a single Daikin *ONE+* smart thermostat. Each sensor is battery-powered, requiring no wires, and can be easily mounted in any room, within the same controlled zone, to enhance comfort and efficiency compared to having only the Daikin *ONE+* smart thermostat by itself.

Key Benefits

- Cost-Effective, Thermostat-Like Control: Provides sensing only, but enables full control via the *SkyportHome* app—offering a smart, low-cost alternative to installing additional zones and thermostats without a physical display
- Wireless and Battery-Powered: Easy to mount anywhere—no wiring needed
- Zonal Comfort and Efficiency: Measures and averages temperature and humidity across rooms
- Compatible with Daikin *ONE+* smart thermostat
- Sub-GHz Communication: No Wi-Fi required
- Battery Life: Up to 1 year
- Pairing wizard for signal strength, sensor naming, and calibration
- Multi-Sensor Support: Up to 8 sensors per thermostat
- App Integration: Control and monitoring via *SkyportHome* (homeowners) and *SkyportCare* (dealers) apps
